

Early Graduation

The total high school experience is an important aspect of the maturation and socialization process of any student. Early graduation will be granted to facilitate the early enrollment of a student in a college, vocational or professional school or university, or early placement of a student in a specific military training program or job.

The following points outline the high school early-graduation policy.

1. The student must have completed all graduation requirements.
2. The student must submit a dated letter from his/her parents/guardians (if under 18) or from the student (if over 18) requesting that he/she be permitted to graduate early and stating the plans necessitating early graduation. This letter **must** be filed with the building principal by the end of the first week of the senior year.
3. Students petitioning to graduate early must obtain Board approval.
4. Students graduating early may participate in the graduation exercise taking place at the end of the current school year.
