

Goal Setting

The District's educational philosophy is based on the belief in the right of every student to develop his/her talents, abilities, and character to the fullest possible extent.

District level and school level goals will be developed. District level goals will encompass all phases of improvement including educational programs, operating facilities and maintenance. School level goals will relate to student performance outcomes in the cognitive, affective and psychomotor domains.

School district educational objectives will serve as the basis for developing improvement goals.

Information from all school district personnel, the Board, related outside agencies, and the general public can be addressed using this goal setting process.

Priorities of the District budget will be developed based on the District improvement goals developed that year.

The Board may invite the participation of others (i.e., administration, staff, public) in this goal setting process.
