

### **Resource Sharing/Interlibrary Loan**

Resource sharing is essential when attempting to provide the very best and most comprehensive educational learning opportunities to students. The Board recognizes that no school district can provide for the great variety of informational needs of all of its users.

Therefore, the School District of Johnson Creek shall participate in mutual resource sharing for the purpose of increasing teaching efficiency and ensuring the best services to students. Additional resources outside of the district's library media collection such as Badgerlink and interlibrary loan services, shall be provided to all students and staff members. The School District of Johnson Creek shall reciprocate by sharing, with other schools and participating libraries, materials that are not in immediate or constant demand by the school's primary clientele.

Patron's (student or staff) assume the responsibility for all non-district resources checked out through interlibrary loan. It is understood that resource sharing does not take the place of the district's responsibility for the development of its own well developed, curriculum based, library media collection.
