

### **Energy Conservation**

The Board of Education will encourage and support an energy conservation and education program to substantially lower consumption of electricity, natural gas, gasoline, and water.

It will be the responsibility of each district employee and student to actively participate in conservation efforts in order to reduce consumption to levels prescribed by state and federal guidelines. However, every effort will be made to maintain programs for the benefit of students.

It will be the responsibility of the district administrator to implement, direct, monitor, evaluate, and report district energy conservation efforts.
